

From small scale deployments with simpler requirements to large scale environments with complex communications requirements, DAKS is the right choice for mission critical communications. DAKS is available in a variety of software and hardware platforms that can be tailored to unique environments and business requirements. With a robust application set, you have the flexibility to adapt the feature set to your environment and budget.

Applications to Leverage as Needed			Expansions	
 <p>Broadcasts/Alerts</p> <p>Target notifications using various media and devices</p>	 <p>Conferencing</p> <p>Convene a team on scheduled or ad hoc basis</p>	 <p>Calling Services</p> <p>One-number dialing for fast access to individuals or groups</p>	 <p>Positioning Services (DPS)</p> <p>Use DAKS for tracking via DECT and WLAN</p>	 <p>Customized Operator (DCO)</p> <p>Customized user interface for complex scenarios</p>
 <p>Personal Security</p> <p>Monitor and protect your employees and lone workers</p>	 <p>On-Call Management</p> <p>Organize your standby and on-call staff reliably</p>	 <p>Info Telephone</p> <p>Notify large groups in parallel with up-to-date status</p>	 <p>Mobile Client (DMC)</p> <p>Integrate alerting processes via app on smartphones</p>	 <p>Desktop Client (DDC)</p> <p>Initiate and receive alarms at employee desktops</p>
 <p>Intelligent Calling</p> <p>Filter calls using a "whitelist"</p>	 <p>Notifier-Pro</p> <p>Multi-platform messaging via user friendly browser</p>	 <p>Gateway</p> <p>Enable calls between diverse networks</p>	 <p>Mail-to-Phone</p> <p>Send emails from anywhere to users/groups</p>	 <p>DAKS-IoT</p> <p>Integrate and control processes with Node-RED</p>

DAKS Hardware Platforms	DAKS Software
 <p>DAKS-100</p>	 <p>DAKS satellite</p>
 <p>DAKS-110</p>	
 <p>DAKS-200</p>	 <p>DAKSeco</p>
 <p>DAKS-300</p>	
 <p>DAKS-400</p>	
 <p>vDAKS DAKS software only (VMware)</p>	 <p>DAKSpro</p>

DAKSatellite & DAKSeco

- ◆ Condensed feature set for smaller hardware platforms

DAKSpro 200

- ◆ 5 to 30 telephony / messaging channels

DAKSpro 300

- ◆ 5 to 480 telephony / messaging channels
- ◆ Optional: hardware monitoring card

DAKSpro 400

- ◆ 5 to 500 telephony / messaging channels
- ◆ State-of-the-art processor architecture
- ◆ Maximum data security and functional security

DAKSpro as vDAKS

- ◆ DAKS software as an integration solution in virtual operator environments
